SUMMARY

I finished my BSc in Computer Science in 2025 and joined OpsMonsters as an intern, where I also lead the intern team. Most of my day goes into a DevSecOps training plan covering Linux administration, shell scripting, networking and security audits. Two of my personal projects are running in production, and I am currently learning AWS and penetration testing.

EXPERIENCE

OpsMonsters 2026 to Present

DevSecOps Intern and Team Lead

- Lead the intern team and coordinate our daily DevSecOps training, about 8 hours a day.
- Work hands-on with Linux: users and permissions, services, networking and shell scripting.
- Practise AWS (EC2, S3, IAM, VPC) and basic penetration testing (recon, scanning, OWASP Top 10) in a lab setup.

PROJECTS

Reelsmith v2 (live)

Python, GitHub Actions, Supabase, Vercel

- Built a tool that picks a trending topic, writes a script, records a voice-over, edits the video and schedules it for YouTube Shorts and Instagram Reels.

Muse Studio (live)

FastAPI, JWT, Docker, Vercel

- Built a dashboard that runs five fictional AI creator accounts on Instagram.

Project Management API

Node.js, Express, MongoDB

- Built a REST API with 36 endpoints, JWT login, role-based access, search and pagination.

Tempest

Python

- Built a command-line security toolkit with 28 tools, including a port scanner and packet sniffer.

May~be

Flutter, OAuth 2.0, Node.js

- Built a music app that unifies Spotify, YouTube Music and Apple Music, with OAuth PKCE login.

EDUCATION

St. Joseph's College (Arts and Science), Koovur, Chennai 2022 to 2025

BSc Computer Science

SKILLS

- **DevOps:** Linux, Bash, Git, GitHub, Docker, Docker Compose, GitHub Actions, Vercel, Render. Learning: Kubernetes
- **Security:** Server auditing, log review, SonarQube, OWASP Top 10, Nmap, Burp Suite, Kali Linux. Learning: Penetration testing
- **Cloud:** Supabase. Learning: AWS (EC2, S3, IAM, VPC, security groups)
- **Backend:** Express, FastAPI, REST APIs, JWT, OAuth, MongoDB, PostgreSQL, Prisma, pytest. Learning: Node.js
- **Used in my projects:** Python, JavaScript, TypeScript, React, HTML, CSS, Flutter, PyTorch
